

## **ATOSS awarded SAP Premium Certification**

ATOSS Staff Efficiency Suite ranks as the only SAP Endorsed App for workforce management in Europe

Munich, 11-23-2021. **The long-standing partnership between ATOSS and SAP comprising around 500 joint customers has reached the next level. ATOSS Workforce Management is now also certified for SAP SuccessFactors and thereby features among the SAP Endorsed Apps. The Premium Certification was awarded based on comprehensive testing of the ATOSS Staff Efficiency Suite. The solution includes all the functions of modern workforce management – time & attendance management, workforce scheduling, workforce forecasting, capacity planning, as well as intuitive apps, self services and a shift exchange platform. The modular standard software is available in the ATOSS Cloud 24/7 and on premises.**

SAP issues the "Premium Certification for SAP Endorsed Apps" by invitation only. The tests were performed at three levels – Integration Certification, Cloud Quality and Static Security Code. Companies running SAP SuccessFactors and the cloud-based ATOSS Staff Efficiency Suite benefit from the efficiency, security and future viability of a best-of-breed solution for human experience management. ATOSS Workforce Management can be flexibly combined with the HR core system SAP SuccessFactors Employee Central or individual modules such as payroll and time & attendance management.

As Dirk Haeussermann, Co-CEO of ATOSS Software AG, stated: "Premium Certification stands for genuine added value for our joint customers – an end-to-end HR solution with a consistent focus on the employee experience. And we are particularly delighted that we are the only workforce management provider with SAP Endorsed App status in Europe."

Fabian Flach, Senior Vice President, Head of SAP SuccessFactors, Middle & Eastern Europe at SAP confirmed as follows: "We rely on a best-of-breed approach where our customers win. With the ATOSS Connector for SAP SuccessFactors, we are expanding our first-class offerings revolving around Human Experience Management (HXM) with the addition of premium workforce management."
